

**looksoftware Introduces the Most Advanced Design and Development Environment the IBM i Has Ever Seen**

**Austin, TX – April 7<sup>th</sup>, 2013.** Today at COMMON, looksoftware announced availability of newlook Version 10, with a significant set of enhancements and new features to ensure developers can deliver amazing applications with more ease and more power than ever before.

**Simplicity, productivity and satisfaction**

Version 10 incorporates the most advanced designer for IBM i applications which makes interface and graphical design easy, fast and even fun.

**A richer experience for mobile & web users**

Enhanced support for mobile & browser delivery leveraging HTML5 and CSS3 make it easier than ever to deliver high quality mobile solutions. Built-in templates are provided for popular browsers, tablets and smartphones, including Apple iPhone, iPad and Android devices.

**Achieve the impossible with RPG Open Access**

All new features work equally easily with RPG OA as with other applications. Genuinely seamless integration between OA and non-OA solutions makes it simple to leverage all the power of RPG Open Access.

*“Our latest development environment provides an unparalleled design experience for IBM i. We have focused on making it easier than ever to create high quality applications for everyone from smartphone users to desktop power users.”* said Brendan Kay, CEO of looksoftware.

*“It is immediately obvious that a lot of thought and effort went into newlook V10. Enhancements like multiple mobile device and custom form sizes, tight integration with RPG Open Access, and the improvements to the flow and workspace area will make modernizing applications even easier. Congratulations to looksoftware for making a great product even better.”* says Travis Riggins, CEO of TSR400.

newlook Version 10 will be generally available in June 2013.

Founded in 1995, looksoftware is a leader in modernization of IBM i applications. The company offers a wide range of products and services designed to assist IBM i customers leverage their existing IBM i solutions to better solve their business problems.
