

snap Benefits

- ▶ Reuse of existing back-end investments, thereby:
 - reducing the risk associated with change
 - reducing training costs
 - increasing productivity
 - reducing implementation times
 - improving project success
 - reducing carbon footprint
- ▶ Easy integration with:
 - leading front-ends
 - web service compliant systems and devices like unified communications
- ▶ Reuse *snap* components in any web service compliant development environment
- ▶ Improve user experience (UX)
- ▶ Streamline workflow and automate business processes

snap solution packs available

- ▶ *snap* for microsoft
- ▶ *snap* for mobile front-ends
- ▶ *snap* for ERPs
- ▶ *snap* for The Cloud

snap your existing back-end applications into any other application without changing a single line of code!

Introducing *snap*

snap provides plug and play integration support for your existing core applications. *snap* can non-invasively connect existing back-end applications or parts of applications, to other applications including:

- Universally accepted front-ends like Microsoft's Office and SharePoint, IBM's Lotus Notes, WebSphere Portal and Google
- Leading application suites including SAP, Dynamics and Oracle and any web service-enabled application
- New technologies, such as Unified Communications systems and devices

snap solution pack series includes:

- looksoftware middleware
- newlook UI widgets
- rich, thin and mobile UIs
- soa architect web services
- specialized connectors eg Google Gadgets, SharePoint webparts
- implementation consulting

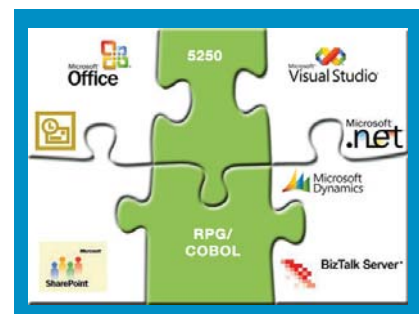

"Around 70% of users of MMS actually spent most of their day in Microsoft Outlook, so providing MMS integration with Office means our customers can cut costs through streamlined-workflows."

Agilysys, a leading ISV

snap for Microsoft

snap connectors for the Microsoft platform include:

- .NET web service access to IBM back-end application components
 - Integrates with BizTalk, Windows Workflow Foundation
- Visual Studio User Interface (UI) container
- Outlook UI container
- SharePoint web part generation
- Word integration
- Excel integration
- Windows Server integration
- IBM back-end application access options
 - 5250/3270 datastream
 - ADO, DDM, DB access
 - RPC
 - Web services support
- Dynamic multi-channel UI generation
 - .NET rich client
 - ASP .NET thin client
 - Windows Mobile

"Our end users are very happy with the improved user experience and additional functionality we have provided. They love the seamless integration with Microsoft Office and now think the System i is wonderful!"

Mr B.H.Lee, IT Team Leader, adidas

snap for Mobile

snap connectors for mobile front-ends include:

- IBM back-end application access options
 - 5250/3270 datastream
 - ADO, DDM, DB access
 - RPC, Web services support
- Optimised for Windows Mobile and Pocket IE
- Supports popular mobile device browsers including Safari and mini-Opera
- Dynamic multi-channel User Interface (UI) generation
 - DHTML thin client
 - Windows Mobile UI support

- SharePoint web part generation
- Multiplatform access:
 - 5250/3270 data stream
 - ADO, DDM, RPC, DB access
 - Web services support

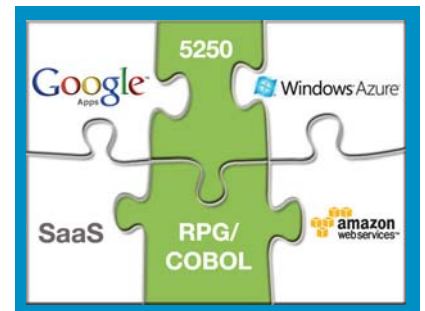

This is the software I've been looking for, for 10 years! We selected looksoftware's snap, to reuse and integrate our customized JDE back-end with new technologies, devices and platforms, including Oracle's BI, Stellent CMS, Microsoft's Outlook and Excel and mobile devices like BlackBerry."
Dave Hyzy, Director of IT, Benderson Development, and Past President of the JDE Global User Group.

snap for The Cloud

snap for The Cloud is a set of connectors that provides developers and vendors of core 5250 and 3270 applications with the technology to:

- Enable end user collaboration and sharing of documents
- Reduce IT costs
- Provide a platform for leveraging Web 2.0 technologies such as Mashups
- Utilize Web Services from many different vendors
- Store data in many remote locations and access it from anywhere
- Share data between users and third parties
- Deploy applications and data using a variety of new mechanisms and sales models
- Implement Software as a Service (SaaS)

snap for ERPs

snap for ERPs supports Oracle's JDE World and Infor's BPCS platforms, connectors include:

- Dynamic, rules-based repository
- Rich, thin & mobile client access
- Web services access, to customized code, supports integration with:
 - IDE's like Visual Studio, Rational Developer
 - BPM and workflow tools
 - MS Office, Word, Excel
- Outlook UI container

"We selected looksoftware to modernize our BPCS investments because we can easily snap our customized BPCS code into multiple front ends using looksoftware's multi-channel support for rich, thin and mobile clients."

Jeffrey Tan, Abbott Laboratories.

snap for The Cloud will initially support Google's Cloud offerings such as Google Apps and GDrive.

"That looksoftware's project and product skills matched their professionalism, was no surprise to me. What was different was the cloud model."

Phil Trabaris, Infinity Resources.
